**MODIANO
& PARTNERS**
European Patent & Trademark Attorneys

OUR COMPANY

Founded in 1950, Modiano & Partners has the practical and legal experience and professional reputation and insight to provide you with comprehensive European IP legal services with a global perspective, through our offices strategically located in Munich (Germany), Milan (Italy), and Lugano (Switzerland). We're European IP specialists with a global perspective and reach – and we integrate business and real-world understanding into our advice and work.

Our intellectual property attorneys (from Europe, the US and Asia) give the firm an international outlook and experience from different legal systems, as well as practical business and strategic insight from servicing firms and corporate clients around the world. As we are fluent in several working languages, we are able to assist English-speaking clients and colleagues without any language barriers. We also have Chinese language expertise to service our China-based clients. We service clients, from multinationals to start-ups, based in the US, Japan, China, South Korea, Canada and Israel, just to name a few.

For each matter we choose the attorney (or attorney team) with the best fit for the client's needs and value

proposition, assessing subject matter expertise and legal specialization, efficiency, and previous success experience in similar cases. This approach generally translates to successful outcomes at significant time and cost savings, all to the client's benefit. We handle everything from filing to prosecution to litigation and opinions, and each of these activities strategically complements the other, leading to increased quality at each stage.

As we are aware of and sensitive to our foreign associates' and clients' budget requirements, we put a premium on efficient and timely communication to address costs, timelines, risk/reward priorities, and any adjustments that need attention. Our proprietary, in-house developed IT case management and docketing system helps us with efficient, cost-effective and focused oversight.

We strive to offer the best possible service at a high value proposition to all our clients and associates, and pride ourselves on our reputation for high quality, thoroughness, strong market reputation (with competitors, the EPO and other international IP Offices), and long-standing expertise.
